Pipeline Engineer

My whole career has been about moving frames. From one artist to the next, from a render farm to a headset halfway around the world, the demands never change: keep the quality up, keep the latency down, and make it bulletproof. I solve pipeline problems and I support the artists who rely on them. That's the work I thrive on. I started deep in film, then moved into games through cinematics. Since then I've followed the heat into VR, shipping interactive experiences alongside some ferociously talented teams. Unreal and Maya are my main tools for content creation, C++/Python is my command center. If a tool or application demands a new language, I pick it up fast and put it to work.

WORK EXPERIENCE

Stream Seed **02/2026 - Present**
Lead Software Engineer **Eugene, OR**

- Designed a dynamic P2P mesh for media delivery, reducing cloud bandwidth usage by 70%, utilizing ISP upload bandwidth, and GPU web codecs

VsfxRyan llc **06/2025 - 12/2025**
Web Developer

- Created multiple Full-Stack web roll-outs, handled everything from wireframe to launch.

Happy Mushroom **01/2021 - 04/2022**
Pipeline Developer **Los Angeles Metropolitan Area**

- Translated complex technical VAD workflows into straightforward tools and documentation, empowering smooth adoption of the Virtual Production Volume
- Designed and maintained internal documentation that became the team’s go-to resource, drastically reducing repetitive support requests and enabling faster creative iteration.

Glassbox Technologies **12/2018 - 01/2021**
Maya TD **Los Angeles Metropolitan Area**

- Developed a virtual camera plugin for Maya (C++/Python) in a cross-time-zone engineering team, delivering a pitch-ready prototype for Netflix and Epic in two weeks.
- Provided hands-on technical support and presented live demos in high-stakes partner meetings, ensuring smooth adoption and direct feedback integration.

Happy Mushroom **02/2018 - 10/2018**
IT Consultant **Los Angeles Metropolitan Area**

- Transformed a new studio into a Disney-compliant secure remote office to support production of high-value IP.
- Administered accounts, OS builds, and endpoints across Unix, Windows, and remote-access platforms for on-site and HQ teams.

The Virtual Reality Company **07/2017 - 10/2017**
VR Pipeline R&D **Los Angeles Metropolitan Area**

- Creating interactive experiences for Vive and Oculus, developing an Animation Exporter for Maya 2017 with files placed inside a Perforce directory and uploaded for immediate use in Unreal Engine.
- R&D for HD stereo video in a realtime unreal scene

VRLIVE **04/2017 - 06/2017**
VR Web Developer **Los Angeles Metropolitan Area**

- Optimized a mobile VR web application to run across all devices, not just iPhone 6 and above, using KRPano for in-browser VR rendering.
- Built the full Node.js backend on AWS, configuring Elastic Beanstalk for rapid command-line deployments and Git for revision tracking with a remote development team.

Frame Machine **06/2016 - 03/2017**
Technical Developer **Los Angeles Metropolitan Area**

- Architected and built a new asset pipeline that reduced previously automated scene-building time by X5
- Solely managed the ingest, processing, and automated tracking of 1,900+ markerless facial mocap videos for 20+ digital characters across 17 performers, supporting a team of 5 animators.
- Built automated Shotgun event triggers that routed assets through the pipeline

Alexx Henry studios **11/2014 - 09/2015**
Photogrammetry Pipeline Lead **Los Angeles, Ca**

- Created real-time 3D face interaction in conjunction with USC Research Labs.
- Fully automated photogrammetry pipeline from camera to cleanup artist.

The Third Floor, Inc. **12/2011 - 09/2014**
Technical Director **Los Angeles Metropolitan Area**

- Brought in late to an already over budget project. Code-fixed the export process to an outside vendor.

Pipeline TD

- Created tools to automate redundant tasks and make the pipeline workflows more efficient. Worked on several artist/show specific tools, but the primary focus was on optimizing the entire production pipeline.

EDUCATION

Bacheror of Fine Arts in Visual Effects
Savannah College of Art and Design 01/2009 - 05/2011

in Graphic Design, Computer Science
Angelo State University 01/2006 - 01/2008

AWARDS & SCHOLARSHIPS

Eagle Scout

SKILLS

Top Skills: API design and integration, C++, C# (familiar), CI/CD, Cloud infrastructure (AWS), Cross-functional technical support, Database design (SQL), Documentation & training, git, Jira, Linux, Maya, Motion capture & facial animation pipelines, Pipeline automation, Python, Real-time video streaming & compression, Shotgun, SVN, Unity (familiar), Unreal Engine, VR/XR development
